9. Other _____.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is a process for producing a modified polyethylene resin by melt kneading of a polyethylene resin (A), at least one modifier (B) specified in the present claim 1, and an organic peroxide (C) having a decomposition temperature of from 50 to 115c, at which temperature a half-life thereof is 1 minute.

Terminal Disclaimer

2. The terminal disclaimer filed on 08/31/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the Patent No. 6,569,950 has been reviewed and is accepted. The terminal disclaimer has been recorded.

The obviousness-type double patenting rejection of claims 1-5 over claims 1-6 of Patent 6,569,950 is overcome in light of the proper Terminal Disclaimer.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is relevant to show the state of the art knowledge.

4. Reference to Bacska discloses a process for preparing an anhydride-modified polyethylene in the presence of an additional polyamide resin by a melt-kneading process condition in the presence of maleic anhydride and a free radical initiator, such that polyethylene and polyamide are in a molten or fluid stage. The resulting grafted product in Bacska invention is different from the grafted polyethylene in the present

claims in light of the presence of decomposing polyamide in Bacskai invention. The claimed invention does not disclose polyamide resin.

The prior art is no close as that previously of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
